## Kempner WSC News

We have had an abundance of calls from members requesting clarification for the TCEQ RPZ requirements. An RPZ is required when there is a potential health hazard to yourself and the public water system. See examples below:

Need RPZ (backflow prevention device) to eliminate potential health hazards: Swimming pool WITH auto fill, Have a lawn sprinkler system to water your grass (hooked to KWSC water service)- this does NOT pertain to an aerobic septic system that sprays out water. Have a well on the property and KWSC water service. Have a rainwater harvesting system.

Do NOT need RPZ- no potential health hazard exists: Swimming pool that you fill with a hose, Do not have a lawn sprinkler system, ONLY an aerobic septic system that sprays out water. Do not have a well on the property. Do not have a rainwater harvesting system.
