## Lampasas Central Appraisal District School Board Presentation

*Matthew Janecek*

The main presentation of the evening was by LCAD president Juan Saucedo. The report included a lot of comparative information as LCAD is and **has been looking to clean up** a lot of discrepancies in property identification.

The report stated there are currently 20,943 parcels with a combined value of \$7.1 billion and a taxable value of \$3.5 billion. That is a \$313 million dollar increase since last year. After a lot of research, 4000 entities were added to the roll.

County wide losses were based on 3000 plus properties that came up as missing, and LCAD found 3500 errors within the system that they are still trying to map and identify. LCAD said **there have been over 20 years of missing revenues** on these properties. Revenues collected from 2025 to 2026 went from \$37 to \$41 million.

There were 1157 protests that have been filed so far this year. LCAD is asking for more personnel, vehicles and appraisal training for employees. LCAD board member Chris Harrison stated that it is a, "... dam mess that we have been trying to fix."
