But I once read that a person's character is defined by how they handle adversity. The world is yours, you can do anything you want to as long as you put your heart and mind into it! So, go out there and show em what you got!!! From all of us at Lampasas Radio we tip our hat to you and wish you the best on all of your future endeavors! Good luck y'all!

Dangers of leaving Children in Vehicles

With summer on us, the heat can be unbearable for some but in a vehicle? It could be fatal, especially for children. The rising temperatures increase the risk of vehicular heatstroke

The Texas Department of Public Safety (DPS) is warning residents that warmer weather places children at greater risk of injury or death if left unattended in a vehicle. Every year children die from heatstroke after being left in a vehicle or entering a vehicle unnoticed. Such negligence could lead to criminal charges. A child should **never** be left unattended in a vehicle.

"Children are needlessly dying every year because they are left unattended in vehicles," said DPS Director Steven McCraw. "The public can do their part by notifying emergency personnel if they witness a child alone or in distress inside a vehicle – regardless of the weather

conditions."

According to the National Highway Traffic Safety Administration, heatstroke is one of the leading causes of non-crash-related fatalities among children. Temperatures inside a car can rise more than 20 degrees in only 10 minutes; and even with an outside temperature of 60 degrees, the temperature inside a car can reach 110 degrees. Leaving windows partially rolled down does not help. In addition, young children are particularly at risk since their bodies heat up faster than an adult.

DPS offers the following tips for preventing vehicular heatstroke deaths and injuries:

- **Never** leave your child unattended in the vehicle.
- Call 9-1-1 if you see a child alone in a car, and emergency personnel will provide guidance.
- Teach children not to play in vehicles, and make sure to place the keys out of reach when not being used.
- Always check the back seats or cargo areas of your vehicle before walking away.
- Establish reminders that help ensure you remove children from the vehicle. For example: leave your bag, lunch or cell phone in the back seat with the child's car seat.
- If a child goes missing, open the doors and trunks to every vehicle in the area. Many heatstroke deaths occur when a child accesses a parked car unnoticed.
